Beige

Weight:

42.5 g (1.5 oz)

Dimensions,

301/301A:

76.2 mm (3.00 in.) high

28.6 mm (1.13 in.) wide

57.2 mm (2.25 in.) length

Dimensions (Continued),

312/312A/312B:

66.7 mm (2.63 in.) high

25.4 mm (1.00 in.) wide

44.5 mm (1.75 in.) length

Stand Thread:

5/8 in. -27 standard

DESCRIPTION AND APPLICATIONS

The Electro-Voice Model 301 and 301A microphone stand adapters (microphone clamps) are designed to allow mounting of any cylindrical microphone with 1-inch case diameter on a microphone stand with 5/8"-27 threads.

The 301 models offer positive grip of the microphone while allowing easy in and out "snap action." A cushion at the base of the clamp is provided so that snap-in action with a live microphone can be accomplished with a minimum of noise. The clamp may be rotated approximately 180 degrees to provide easy orientation of the microphone to any angle.

The Electro-Voice Models 312 and 312A stand adapters are newly designed units which provide the best features available on the 310 and 311 series clamps.

Constructed of durable Lexan and polypropylene, the 312 model clamp provides a positive non-slip grip for the microphone. Use of this non-metallic material prevents marring or scratching of the microphone case. The clamp is designed to allow quick change from hand-held to stand use. The 312 provides the positive grip associated with the 310 clamp, while allowing easy in and out access associated with the 311 clamp. A special cushion pad is provided at the base of the clamp so that "snap-in" noise with a live microphone is kept to a minimum.

Specifications subject to change without notice.
