5/8 inch -27 standard

Material:

Polycarbonate

Finish,

310:

Black

310A:

Gray

Weight:

42.5 g (1.5 oz)

DESCRIPTION AND APPLICATIONS

The Electro-Voice Models 310 and 310A are designed to allow mounting of any cylindrical microphone with a three-quarter inch case diameter on a microphone stand having a standard 5/8 inch -27 thread.

The Models 310 and 310A are constructed of a durable polycarbonate material, providing a positive non-slip grip on the microphone. Use of this non-metallic material prevents marring or scratching the microphone case.

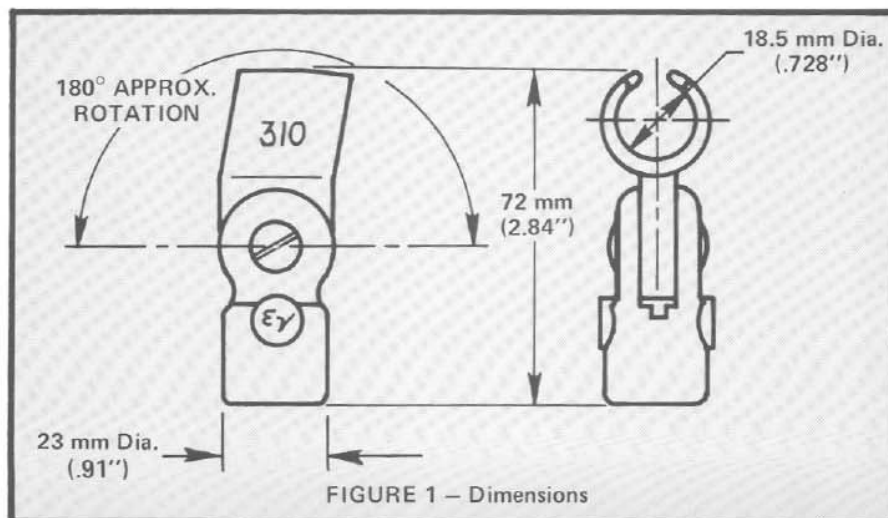

The microphone may be placed in the clamp even when a cable is attached to the microphone. Slip the cable thru the opening in the top of the clamp and slide the microphone into position.

The clamp may be rotated approximately 180° to provide easy orientation of the microphone angle.

The Models 310 and 310A may be used with the following Electro-Voice microphones:

627C	DO56L
631B	DS35
635A	RE10
647C	RE11
649B	RE15
CS15	RE16
DO54	RE18
DO56	RE55
