## Model 337 Windscreen

### SPECIFICATIONS

**Material:**  
Acoustifoam™

**Color:**  
Gray

**Dimensions,**  
**Diameter:**  
63.5 mm (2.50 in.)  
**Inside Diameter:**  
31.8 mm (1.25 in.)

**Weight:**  
2.5 grams

**Size:**  
Will fit EV Model 627C

### DESCRIPTION AND APPLICATIONS

The Electro-Voice Model 337 windscreen has been created particularly for use with the Electro-Voice Model 627C microphone. It is designed to reduce noise generated by the movement of air over the microphone surfaces without altering frequency response or polar pattern of the microphone.

The Model 337 windscreen is fabricated of Acoustifoam™ a material developed specially for this use. Attenuation of signal is less than 1 dB at 10,000 Hz.

### IMPORTANT NOTE:

To accomplish the greatest possible wind blast reduction, it is recommended that a Model 513A filter be employed in conjunction with the Model 337. The Model 513A is a low-frequency cutoff filter which provides high attenuation to frequencies below 100 Hz.

### INSTALLATION

The Model 337 is designed to fit tightly over model 627C microphone. To install, stretch gently over the front of the microphone and slip into position. The Acoustifoam material will shrink tightly into position in only a few seconds.
