Model 358 Microphone Clamp

SPECIFICATIONS

Weight:

56.7 g (2 oz)

Material:

Lexan and polypropylene

Finish:

Black

Stand Thread:

5/8" -27 standard

DESCRIPTION AND APPLICATIONS

The Electro-Voice Model 358 Microphone Stand Adapter (microphone clamp) is designed to allow mounting of a microphone with tapered case diameter on a microphone stand with 5/8"-27 threads. The Model 358 may be used with Electro-Voice Microphone Models PL88, PL91A, 629, 660, 671 and 681.

The Model 358 offers positive grip of the microphone while allowing easy in and out action. A cushion at the base of the clamp is provided so that slip in action with a live microphone can be accomplished with a minimum of noise. The clamp may be rotated approximately 180 degrees to provide easy orientation of the microphone to any angle.

Constructed of durable Lexan and polypropylene, the Model 358 clamp provides a positive non-slip grip for the microphone. Use of this non-metallic material prevents marring or scratching of the microphone case. The clamp is designed to allow quick change from hand held to stand use.

Specifications subject to change without notice.
