

Electro-Voice Commercial Microphone Series EV682 and EV682S

A clear line of communication.

The EV682 and EV682S dynamic omnidirectional microphones ensure clear, dependable communications within or between buildings. The EV682 is always on, always listening. The EV682S employs an on-off switch for push-to-talk functionality.

With a brushed satin chrome finish, these slim, trim wall-plate microphones blend into any architectural setting and can be mounted quickly and easily on any standard "single-gang" electrical box.

Weatherized and ruggedized, they will continue to perform dependably and look good over years of use. Competitively priced, they are unconditionally guaranteed for two full years and backed by a limited lifetime warranty on the element.

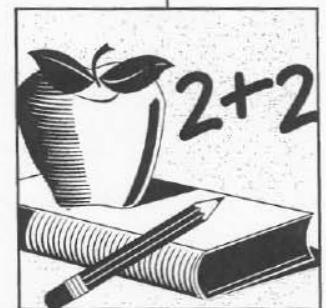

Whatever the need, whatever the plans call for, you can rely on Electro-Voice wall-plate microphones for a clear line of communication. Just as you've come to expect from Electro-Voice.

Sound Reasons for Selecting Electro-Voice EV682 and EV682S Wall-Plate Microphones

- Dynamic element
- Omnidirectional polar pattern
- Mount on any standard "single-gang" electrical boxes
- Aluminum assembly on steel cover plate
- Rubber shock mount
- Model EV682S includes double-throw switch for push-to-talk functionality
- Limited lifetime warranty
