DESCRIPTION

The RMR2 is a single-rack-space kit for mounting the Electro-Voice R2 diversity receiver in a standard 19-inch rack. The kit consists of a one-rack-space tray with a cut-out for the face and antennae of the receiver, two screws to attach the receiver to the tray, and four rack screws with washers.

MOUNTING THE R2 RECEIVER

First, remove the four adhesive-mounted feet from the bottom of the R2 receiver by pulling sideways and up. Place the receiver in the tray with its front (display and antennae side) against and centered with the rectangular cut-out in front of the rack tray. Holding it in place, turn the

receiver and rack tray upside down and line up the two holes in the bottom of the rack tray with the two holes in the bottom of the receiver. Using the smaller screws, carefully screw the receiver to the rack tray until it is firmly attached. Use the included rack screws and washers to mount the unit into a rack.
