

SPECIFICATIONS

Material:
Acoustifoam™

Weight:
3 grams (0.105 oz.)

Finish:
Charcoal gray

Size:
Fits Models RE10, RE15, 631B,
635A, 660, 660A and 664A
microphones

DESCRIPTION

The Model 314E is designed to be used as a windscreen for Models 631B and 635A microphones. It can also be used as a pop filter with the RE10, RE15, 660 and 664A microphones.

Unique open-cell Acoustifoam material adds additional protection against dust, magnetic particles, moisture, etc., while also performing its primary function of screening out wind noise and annoying p-pops.

The Model 314E can be used with any microphone similar in shape to the 631B or 635A.

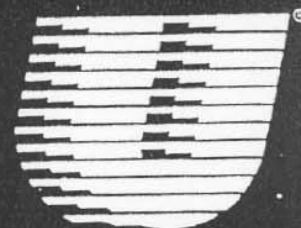

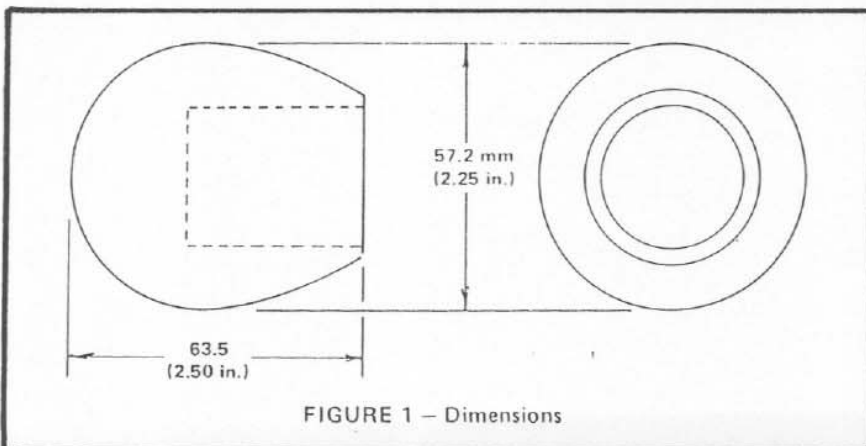

INSTALLATION

The 314E slips over the end of the microphone easily by hand. A snug fit is all that need be checked.

IMPORTANT NOTICE:

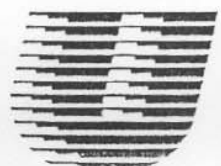

To accomplish the greatest possible wind blast reduction, it is recommended that a Model 513 filter be used with the microphone and the Model 314E. The 513 is

a low-frequency cutoff filter that provides high attenuation of frequencies below 100 Hz.
