

DESCRIPTION AND APPLICATIONS

The new Electro-Voice AR400 and AR500 horns were designed specifically for use with the new Electro-Voice Model 1823 driver.

Ideal for fixed and mobile emergency systems, these horns may also be used successfully as high-level P.A. horns for voice and limited music applications.

Both the AR400 and AR500 horns are made of durable spun aluminum and will withstand all weather and temperature conditions. A collar is provided to insure a weather-tight seal between the horn and the model 1823 driver.

SPECIFICATIONS

Low Frequency Cutoff,

AR400: 350 Hz

AR500: 450 Hz

Length,

AR400: 7¼"

AR500: 4½"
