857 or 857A	Limed Oak	243.89
857 or 857A	Walnut	246.00

ELECTRO-VOICE MODELS 857 AND 857A HIGH-FIDELITY EQUIPMENT CONSOLES.

Electro-Voice, Inc. Buchanan, Michigan now offers the new Models 857 and 857A high-fidelity equipment consoles. The smartly designed console mounted on a slatted bench includes a PC2 preamplifier, an A15 power amplifier, and a 12TRXB loudspeaker mounted in an Aristocrat enclosure. All of these components are matched for compatibility, quality, and price. These units do not include a turntable or record change.

The famous Model PC2 preamplifier-music control center is small, compact, and easily mounted. A simple four dial control system assures ease of operation. The PC2 provides equalization for both magnetic and ceramic cartridges. Precision manufacturing accounts for its extra long life and steady performance. With all of these plus features, the PC2 remains a relatively low-price pre-amplifier unit.

The new, exclusive E-V Circlotron Circuit is employed in the 15 watt, Model A15 power amplifier. A complete absence of switching transients eliminates listening fatigue. Extremely low impedance of the output transformer produces full power output at 20 cycles. Critical damping guarantees crisp, full bass response.

An integrated three-way loudspeaker, the 12TRXB, mounted in the popular Aristocrat enclosure completes the electronic equipment in the 857 console. The speaker incorporates a VHF driver mounted concentrically to insure smooth room coverage. The 29-5/8" x 19" x 16-5/16" Aristocrat folded corner-horn enclosure occupies a minimum of space yet increases the efficiency of the speaker system by using the walls of the room as an extended speaker horn.

The equipment console measures 54" x 16" with a depth of 17-1/4". The center storage compartment will accomodate any size line amplifier. Record changer drawer slides forward at a convenient operating height.

The 60" x 20" slatted bench mount elevates the cabinet to a height of 17". The slats are 1" x 2" solid poplar. Legs are made of the same solid poplar with brass ferrules.

ORDERING INFORMATION

Model 857 - Shipped with an uncut motor board which is removable and can be used to mount any record changer. Please specify whether mahogany, walnut, or limed oak finish is desired.

Model 857A - Shipped with a motor board pre-cut for Garrard RC68 and RC98 record changers. Please specify whether mahogany, walnut, or limed oak finish is desired.

CONSUMER NET PRICES

857 or 857A	Mahogany	\$352.00
857 or 857A	Limed Oak	369.00
857 or 857A	Walnut	374.00

ELECTRO-VOICE, INC., BUCHANAN, MICHIGAN

ELECTRO-VOICE OFFERS SPECIAL ON NEW EQUIPMENT CONSOLE

Electro-Voice, Inc., Buchanan, Michigan offers a special customer price on the new Model 857 equipment console. By purchasing a PC2 preamplifier, an A15 power amplifier, and a 12TRXB loudspeaker with Aristocrat enclosure the buyer has an option to receive a \$200 value, newly designed equipment console and bench for only \$82.50.

The Model 890 console enclosure measures 54" x 16" with a depth of 17-1/4". The center storage compartment will accomodate any size line amplifier. The front panel of the compartment can be removed for conversion to record storage or for installation of an 8" speaker enclosure. The record changer drawer slides forward at a convenient operating height.

The Model PC2 preamplifier-music control center is small, compact and easily mounted. A simple four dial control system assures ease of operation. The PC2 provides equalization for both magnetic and ceramic cartridges. Precision manufacturing accounts for its extra long life and steady performance. With all of these plus features, the PC2 remains a relatively low-priced preamplifier unit.

The new circlotron circuit is employed in the 15-watt, Model A15 power amplifier. A complete absence of switching transients eliminates listening fatigue. The extremely low impedance of the output transformer produces full power output at 20 cycles. Critical damping guarantees crisp, full bass response.

The speaker system mounted in an Aristocrat enclosure is the Model 12TRXB. This triaxial loudspeaker incorporates a VHF driver concentrically mounted to insure smooth room coverage.

The 60" x 20" Model 590 slatted bench mount elevates the cabinet to a height of 17". The slats are 1" x 2" solid poplar. Legs are made of the same solid poplar with brass ferrules.
